Simphony Essentials: the complete cloud POS for essential restaurant operations

Oracle Food and Beverage is the leading provider of point-of-sale systems to restaurants of every size and style. From international chains to independent startups restaurants all over the world rely on Oracle MICROS Simphony to simplify their operations, reduce costs, expand revenue channels, manage business performance and deliver a modern customer experience. Oracle MICROS Simphony Essentials is rooted in best practices, and thoughtfully configured for simplicity.

- *Intuitive ordering*
- *Instant kitchen communication*
- *Real-time reporting*
- *Easy integrations*
- *Simply connect all your payment processing, online ordering, delivery, mobile and reservation management on a single cloud*

Simple and Scalable
Easily connect all your essential business processes from your kitchen to payment processing, online ordering, delivery, mobile and reservation management.

Fast, Flexible and Customer-Centric
Centralize your customer engagement channels, add new menu items, spin up special offers and deliver a consistent customer experience across every touchpoint and device.

Cost Efficient and Controlled
Essential reporting and analytics are included so you can view reports by employee, by day part, by order channel, and across multiple locations. With mobile push notifcations, you can stay informed no matter where you are and never miss an update or alert.

"Oracle has definitely helped us to streamline our operations. It is simple and fast to use, and utilizing the product helped us become a smarter business."

– Pablo Colmenares, founder, New York Burger

"The solution from Oracle Food and Beverage gives us the reliability we need day to day and the confidence to scale quickly,"

– Tim Entwistle, owner of WOLF
