

The Complete Digital Food Safety and Operations Platform for Restaurants

The Jolt platform helps you to achieve:

Team Accountability

Employees that work like you're there, even when you're away

Digital Food Safety

Food that is always stored safely, prepared properly, and served fresh

Employee Performance

Team members who are trained faster and execute better

Lists

Digital checklists and forms to ensure that employees are addressing the critical aspects of the business

Complete Accountability

Require task completion with photo, QR code, measurement, etc. Employee name, result, and timestamp appears on every completed task

Automated Workflows

Customize when tasks display, and are due. Notifications alert users when tasks are missed. Corrective action prompts employees to make adjustments when needed

Consistency & Visibility

Publish content across all stores allowing for easy on-the-fly changes. View and drill down into completion performance at any level for detailed root-cause analysis

Example Lists & Forms

- Opening/Closing Checklists
- Line Checks
- Daily/Weekly Cleaning
- Temperature Logs
- HACCP/Food Safety Audits
- Customer Recovery
- Manager Walk-thrus
- Employee Write-ups
- Performance Reviews
- New Hire Orientation
- Quizzes and Tests

Add-Ons

Temperature Probe

Touchless Temperature Capture™ via integrated Bluetooth probe

Manager Logbook

Capture notes and shift events that can be flagged for attention

Information Library

Upload and attach media and other content to lists for on-the-spot training

Labels

A labeling solution that streamlines label printing needs by reducing time and eliminating costly errors

Ultimate Control & Ease of Use

Create and customize templates with the right information for any type of label. By using the Jolt app, employees can access and print preloaded label items that are organized by category

Save Time & Money

Jolt labels are 100% accurate, cost less than 1/3¢ each, and replace handwritten labels that are prone to human error. Customers find an average savings of 2+ hours in daily labor costs on top of the savings over the cost of other labels

Other Benefits

- ✓ Label reports display trends and expose operational inefficiencies
- ✓ Simplify workflows by printing labels directly from Jolt Lists
- ✓ Set par levels and automate inventory processes and prep needs

Label Examples

- Date Codes
- Nutrition Facts & Ingredients
- MRD (Made, Ready, Discard)
- To-Go/Delivery Orders
- Grab & Go Items
- Catering Orders

Sensors

A remote monitoring solution that protects inventory with alerts when temperatures fall outside of a defined range

Proactive Temperature Monitoring

Wireless sensors continuously monitor temperatures, proactively managing the condition of store equipment from anywhere. Prompt notifications are sent if temperatures fall outside of the designated safe range

Powerful Reporting

Access detailed graphs and charts on dashboards available both in-app, and online. Customizable min, max, and averages are simple to pull up and display for food safety inspections

Use Sensors to Monitor:

- Walk-in Fridges/Freezers
- Bread Proofer Temp/Humidity
- Line/Prep Station Water Temps
- Product Simulation
- Reach-in Coolers
- and much more

Scheduling

Reduce labor costs with the employee scheduling tool for businesses that need an intuitive yet powerful shift management solution

Save Time

Build a schedule that takes minutes, not hours. Create templates for easy reusability, copy and paste shifts or entire schedules, and see employee availability all in one app

Eliminate Hassle

Employees can easily update their availability and request time off using the app on their own personal device. Operators can manage shift trades and approve or deny requests instantly

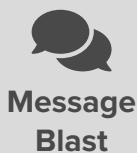

Maximize Profits

Ensure efficient scheduling by tracking labor costs with custom rules for overtime and breaks, measuring productivity, and building out revenue models

Other Benefits

- ✓ Integrate schedule with Jolt Time Clock to control shift durations and mitigate time theft
- ✓ Assign stations or special tasks to give employees details that they'll need for their shift (eg. closer, trainer, etc.)

Add-On

Use Message Blast to text and email the team. A quick selection of a group of employees or the entire team allows for updates on upcoming events or meetings, an important announcement, etc.

Time Clock

The time & attendance solution for businesses seeking more from their time tracking system

Smart Attendance Tracking

Jolt Time Clock comes equipped with face-detection and photo capture technology to ensure accountability and eliminate buddy punching. Geolocation recording allows for multi-location and off-site time tracking

Flexible Configuration & Visibility

Make any Jolt connected device available to capture employee time punches. Use the app to see who's clocked in and out in real time – from anywhere. Incorporate breaks into employee shifts and customize compensation rules to calculate overtime hours

Other Benefits

- ✓ Access labor reports and export time clock punch data for payroll
- ✓ Integrate Time Clock with Jolt Scheduling to flag or prevent punches that don't align with scheduled shifts
- ✓ Management approval and written employee explanation required for forgotten clock in/out punch or when maximum shift length is exceeded

Announcements

Ensure that important information is not overlooked by embedding announcements directly into Jolt Time Clock. Upon clock-in, announcements are displayed to designated employees or the entire team. Questions can be added to ensure comprehension.

Add-On

Great for:

- Policy changes
- Event memos
- Promotions
- Menu Specials
